

## Foreword

This compendium has been compiled to serve as guiding beacon for all BMRC officers and staff in discharging their duties and responsibilities.

Environment Policy, Energy Management Policy, Waste Management Policy and Water Management Policies of our organization guide one and all within BMRCL and outside to take note of the commitment that the metro employees should have towards the need to address the compelling present day problems of communities. These are aimed to identify one's responsibility to constantly improve the environment around us.

BMRCL should be proud to be the follower of these policies in its Project and O&M activities that get reflected in its commuter services and construction methods from which others have to emulate for the betterment of the society.

I commend the team which has brought out the policies and call upon one and all to take part in the efforts towards cleaner future of Bengaluru.

Bengaluru  
2nd April, 2019

  
Ajay Seth  
Managing Director  
Bangalore Metro rail Corporation
